

Harsh Vardhan Pandey

+91-7318074222 | harshvardhanpandey372@gmail.com | [GitHub](#) | [LinkedIn](#) | [LeetCode](#) | [Portfolio](#)

Education

Indian Institute of Information Technology, Gwalior

2024 – 2028

Bachelor of Technology in Information Technology

CGPA: **9.30** (Till 4th Semester)

SKD Academy

Class X: **97%** | Class XII: **93%**

Experience

Open Source Contributor

May 2026 – Present

Cilium

Go, Kubernetes, Helm, eBPF

- Engineered production-grade Go, Helm, and Kubernetes features for a CNCF cloud-native networking project.
- Designed Helm configuration logic for automatic native-routing CIDR derivation with precedence handling.
- Modernized Kubernetes policy testing by migrating Ginkgo E2E suites to Hive component tests and building reusable validation utilities.
- Contributions: [\[Native-Routing CIDR Derivation\]](#), [\[Policy Test Migration\]](#), [\[EC2 Egress Configuration\]](#).

Mentor

Dec 2025 – Mar 2026

Social Winter of Code (SWOC)

Remote

- Mentored contributors as part of SWOC and the IndieHub open-source community.
- Guided developers in Git, GitHub workflows, issue tracking, and pull request reviews.
- Reviewed pull requests, mentored contributors, and improved code quality through collaborative software engineering practices.

Technical Skills

Languages: Go, Python, JavaScript, C++, SQL

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT, Authentication

Frontend: React.js, Next.js, HTML, CSS

Databases: MongoDB, PostgreSQL, MySQL

Cloud & DevOps: Docker, Kubernetes, Helm, Linux, Git, GitHub, Postman

Computer Science: DSA, OOP, DBMS, Operating Systems, Computer Networks

Projects

DevLog – AI-Powered Local Git Workflow Assistant

[Live Demo](#) | [GitHub](#)

- Built an AI-powered Git workflow platform using React, FastAPI, and Ollama for fully local commit and pull-request generation.
- Integrated local LLM inference with Git and GitHub APIs, eliminating cloud dependency while preserving source-code privacy.
- Designed RESTful services for diff analysis, commit automation, repository insights, and PR lifecycle management.
- Containerized the system with Docker and architected Kubernetes-ready deployment workflows.

EPC Intelligence Platform

[GitHub](#)

- Built a platform that unified specifications, RFIs, procurement records, commissioning documents, and quality records into a single workspace.
- Developed REST APIs and database models for project, document, and workflow management across the EPC lifecycle.
- Implemented semantic document search and citation-based question answering over engineering documents.
- Integrated dashboards for project KPIs, schedule risks, compliance tracking, and supply-chain monitoring.

Candee – Conference Management Application

Team Project

- Developed backend APIs, database models, and frontend modules for an IEEE international conference management platform.
- Designed participant registration and submission workflows using REST APIs and MongoDB.
- Collaborated in a 3-member Agile team using Git-based workflows, testing, debugging, and code reviews.

Achievements & Leadership

- Solved **500+** DSA problems across LeetCode and Codeforces; achieved **Knight (1859)** on LeetCode.
- Ranked top in the batch (CGPA **9.30**), secured highest SGPA in Sem III (**9.55**) and Sem IV (**9.57**), and received the **MCM Scholarship**.
- Won the **IEEE Hackathon** as Team Lead, mentored **100+** students through GitHub/Open Source workshops, and was recognized as a **Hacktoberfest Super Contributor**.
- Reached the **Semi-Finals** of **ZERO's Arena**, a national technical competition organized by Code Geass and OpenNMindAI.
